FLL App – Bilingual
English and Spanish
Available on Google Play
or Apple App Store

TIRED OF DRIVING IN CIRCLES?

Tired of going in circles in the airport garage? Check out Fort Lauderdale-Hollywood International (FLL) Airport's new real-time **Space Finder parking system**. A digital display tells how many spaces are open on each level. Just follow the color-coded signs inside the parking complex to find a space near your airline's terminal: **Green indicates open**; **red indicates occupied**; **purple indicates reserved**; **blue indicate handicapped space**.

In addition, over 3,000 new on-site parking spaces were added in the Cypress Garage in May.

FLL APP: They have an app for that! Real-time parking availability, reserve a space, locate your car, flight info, airport guide and more.

FORGET WHERE YOU PARKED YOUR CAR? Stop at a Parking Kiosk, located at baggage claim areas and in the Hibiscus and Palm garages: enter your license plate number. That's all there is to it!
