

WESTON REGIONAL PARK *Parking Lot Resurfacing Project Underway*

All parking area surfaces and the asphalt walking/jogging paths within the Weston Regional Park are being milled and paved in a resurfacing project underway within the park.

Residents and visitors will see heavy equipment and trucks staged within areas of the park as work is being done progressively through mid-December.

The contractor, Weekley Asphalt Paving, Inc., is phasing the project and working closely with Weston Public Works, Parks & Recreation and the Weston YMCA to minimize or prevent interruption of park or YMCA services.

Included within the project is the installation of tree root barriers, the replacement of damaged curbs and reinstallation of parking and traffic pavement markings. This will be the first time since its opening in 2000, that the entire Regional Park parking lot has been resurfaced.

The Weston Regional Park, is located at 20200 Saddle Club Road, Weston.
