

BUILDING CODE SERVICES

DUCT INSPECTION AND SEALING CERTIFICATION

THIS FORM IS REQUIRED BY THE 2010 FLORIDA BUILDING CODE ENERGY CONSERVATION SECTION 101.4.7.7.1. - **TO BE ATTACHED TO AIR HANDLER**

Property Address: _____

Manufacturer & Model No. of Equipment: _____

Contractor Name: _____

License Number: _____

Date Performed: _____ Permit No.: _____

I hereby certify that the ductwork at the above address associated with an HVAC equipment change-out has been inspected and sealed in accordance with the 2010 Florida Building Code Energy Conservation, Section 101.4.7.1 by the following allowable method(s):

- Where needed, all existing and accessible ducts (minimum of 30 inches clearance) have been sealed using reinforced mastic or a code-approved equivalent.
- Ductwork was found to be located within conditioned space where further inspection and sealing is not required. (Exception 1, Section 101.4.7.1.1)
- Ductwork was inspected at time of install and we found that joints or seams were already sealed with an approved fabric and mastic. (Exception 2, Section 101.4.7.1.1)
- The duct system was tested and repairs were made as necessary. (Exception 3, Section 101.4.7.1.1) Duct system tested by (company and/or individual) _____
