

Traffic and School Zones – A Note from the City Manager

Welcome to the new school year. Traffic in and around school zones during the first week of the new school year is not typical of traffic for

the remainder of the school year. We welcome your concerns at this time and will make note of them for evaluation and review by the City's Traffic Engineer and BSO's Weston Traffic Unit.

Any changes in operations, if warranted, will be made after the first or second week of school when traffic assumes its routine patterns.

Thank you for your patience, and for those with children in the schools located in Weston, have a great school year.

**John R. Flint, City Manager
City of Weston**
