## AS THE STORM APPROACHES...

### **HURRICANE PREPAREDNESS – A Continuing Series**

Thankfully Tropical Storm Issac passed South Florida without any major damage. As you put away your hurricane supplies, please take a minute to reassess your family plan and remember these important details should another storm head our way.

1. Install your hurricane shutters or plywood. Do not use masking tape or duct tape on windows; it does not prevent windows from breaking and it can be difficult to remove after the storm.
2. Bring inside any lawn furniture, BBQ grills, trash cans, hanging plants, etc. that may be picked up by the wind.
3. Fill your cars' gas tanks and withdraw enough money from your bank to last for several days.
4. Make sure prescription medications are available for several weeks. And don't forget about the special needs of infants, the elderly, the disabled and pets.
5. Gather your important papers, including insurance policies, and place them in plastic bags or other waterproof material and keep them with you.
6. Wedge sliding glass doors to prevent them from being blown off tracks.
7. Check for loose rain gutters and down spouts.
8. Turn up refrigerators and freezers to maximum cold.
9. Disinfect a bathtub in your home and fill it with water to use for washing dishes and flushing toilets.
10. Evacuate if you are required to do so or if you do not wish to remain in your home during the storm; [click here](#) for a list of Broward County hurricane shelters. Remember that pets are permitted only in certain shelters, and you must pre-register to access that shelter. Call the Humane Society of Broward County at (954) 989-3977 for more information.

For up-to-date information during a storm, please visit our website at [www.westonfl.org](http://www.westonfl.org) or our Weston Cable Channel or AM Radio 1680.

## TRANSPORTATION OPTIONS FOR SENIORS IN BROWARD COUNTY

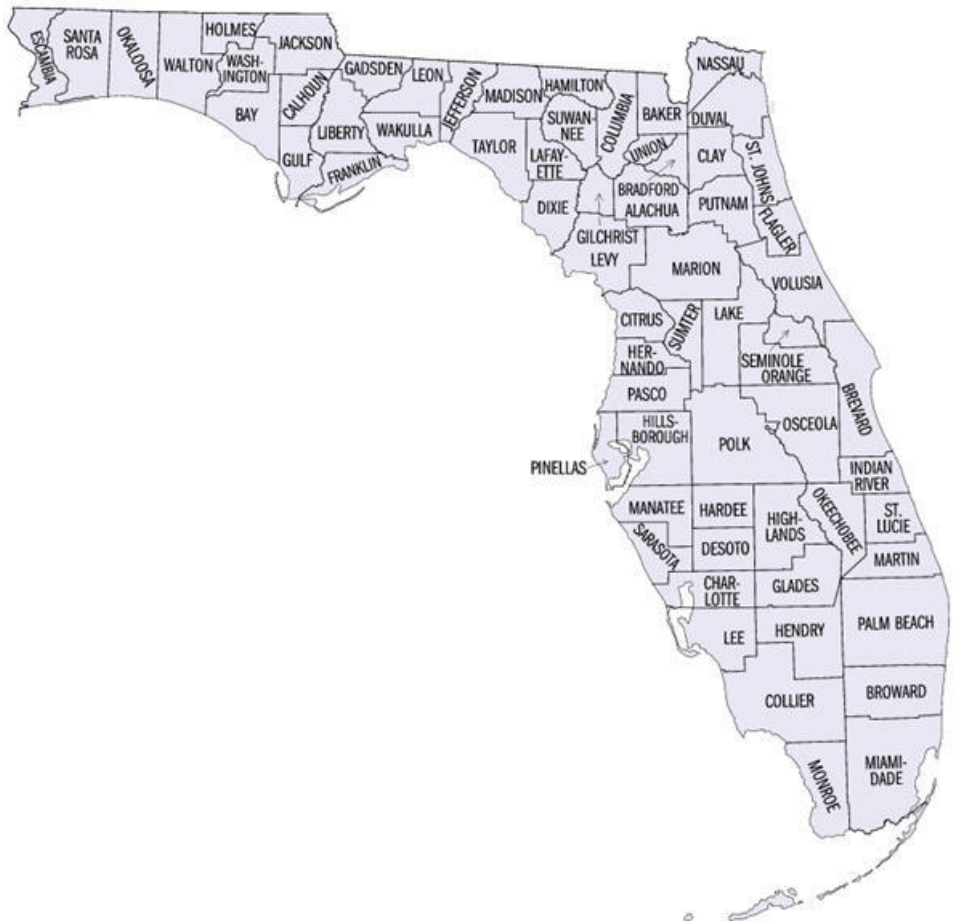

Florida

senior safety resource center

Florida has the largest population of older adults in the United States; many of them are unable to or choose not to drive. To address the issue, the University's of Florida's Senior Safety Resource Center, created an easy-to-use database containing over 700 transportation options to help senior remain mobile within their own communities.

One of the reasons many people might continue to drive beyond the time they can safely do so is because they feel they have no other transportation choices to get to where they need and want to go. To help you find the transportation options available in your community [click on your county in the map below](#). Then search the Florida Senior Safety Resource Center (FSSRC) database to find the options that best fit your mobility needs.

## BEST PRACTICES FOR CYBER SAFETY FOR YOUR BUSINESS

1. **Strong passwords.** Create a password that is at least 15 characters long, and a combination of letters, numbers, and punctuation. Keep your passwords private; never share them with others.
2. **Antivirus software.** Set up your antivirus software to monitor your system in "real time." Keep it updated to protect you from the latest malicious software.
3. **Firewalls.** Firewalls protect your computer from hackers and other unwanted traffic. Current operating systems (for Mac and PC) come with a firewall already installed; keep it turned on.
4. **Installing security patches.** Carefully review and install software patches as soon as they become available, especially for your operating system. This reduces the amount of time that you are vulnerable to an attack.
5. **Facebook Privacy.** If you aren't careful on sites like Facebook and Twitter, you can accidentally share information with everyone, not just your friends. Check the settings frequently to ensure your information stays protected.
6. **Download Safety.** Malware and spyware often hide within downloads, especially the free ones. Before you download anything verify that the source is legitimate. Scan email attachments with your antivirus program before you open them.
7. **Email Scams.** Identity thieves are creative in finding ways to get your personal information. Before you fill out any form in a website, or respond to any email, make sure you know where that information is going. If necessary, make a phone call to double check.
8. **Internet Auction Fraud.** Fraudsters and scam artists have become very sophisticated. Watch out for deals that are too good to be true, especially on auction sites or online classified ads. Do some research on any person or company before you do business with them.
9. **How to Secure Your Wireless Network.** Keep broadband thieves and hackers out of your wireless network at home. Create a good strong network password, and share it only with people you trust.
