WestonNights Outdoor Concert Recap

WESTON COMMUNITY CPR DAY

*Give An Hour,
Offer Life!*

FREE

- ▶ Saturday, February 10, 2018
- ▶ Anytime between 10AM – 2PM
- ▶ Weston Community Center
20200 Saddle Club Road, Weston, FL 33327

▶ **Families Welcome.**

- Ages 8 and up are invited to participate in Hands-Only CPR training.
- A simplified form of CPR using only compressions and no breaths.
- For every minute without CPR, the chance of survival goes down 10%.
- Participants will receive instruction from BSO Fire Rescue and Cleveland Clinic.
- Also available: instruction on how to do the Heimlich and operate an AED.
- You will be in and out in an hour if you want to learn all three: CPR, AED & Heimlich.

No reservation required; just stop in between 10AM and 2PM. Light refreshments.

A community needs to rely on one another.

A cardiac event or drowning can happen anytime.

Will you be ready to help?

TEMPORARY CHANGE IN TAP WATER CHLORINATION TREATMENT Monday, February 5th – Friday, March 9, 2018

The City of Sunrise maintains the highest quality standards to provide clean, safe drinking water to its customers, which includes the City of Weston. From **February 5th through March 9th**, the Sunrise Utility Department, which provides water to the City of Weston, will switch from monochloramine to free chlorine disinfection in its drinking water treatment system to provide additional protection against bacteria.

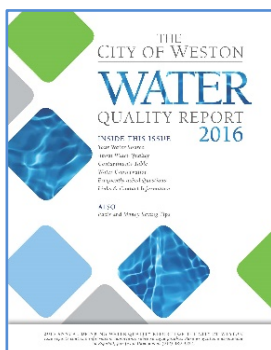

What is Chlorination Water Treatment?

This **temporary** treatment of the water system is a common practice for water suppliers that use a chlorine treatment method. This periodic program is recommended by the Florida Department of Health.

This procedure does not cause any adverse health effects. However, some individuals may notice a slight change in the taste, odor or color of the water during this time.

Special Considerations: Kidney dialysis centers, nephrologists and hospitals have been notified in order for them to make any adjustments necessary in the various processes which they operate. Any questions regarding kidney dialysis should be directed to the user's doctor or dialysis specialist.

Some aquatic and marine animal species are sensitive to free chlorine; persons maintaining aquariums with any sensitive species may wish to contact their pet supply stores regarding dechlorination.

Information about drinking water and health is available on the [Environmental Protection Agency's website](#), and through the **Safe Drinking Water Hotline: 1-800-426-4791**. For details regarding the City of Sunrise's treatment system, please contact the Utilities Department at **954-888-6000**.

 **View Weston's Water Quality Report [here](#), or click on the image shown at left.**

FEBRUARY'S HEALTHY LIVING TIP

3 Steps to Fight the Flu

According to the Centers for Disease Control and Prevention (CDC), the flu is a contagious respiratory illness caused by influenza viruses that infect the nose, throat, and lungs. Most experts believe that flu viruses spread mainly by droplets made when people with flu cough, sneeze or talk.

These droplets can land in the mouths or noses of people who are nearby. Less often, a person might also get the flu by touching a surface or object that has flu virus on it and then touching their own mouth, eyes or possibly their nose. Here are three practical steps that anyone can apply to their lives to fight against the flu!

1. Get Vaccinated

A yearly flu vaccine is an important step in protecting against seasonal flu.

2. Take Everyday Actions

Wash your hands often with soap and water or use alcohol-based hand cleansers.

Cover your cough or sneeze into your sleeve or tissue. Toss the tissue in the trash after you use it.

Avoid touching your eyes, nose, and mouth. Germs spread this way.

3. Take Antiviral Medicine, if Recommended

Stay at home if you are sick and take antiviral medicine if recommended by your health care provider.

FEBRUARY IS RESPONSIBLE PET OWNERSHIP MONTH

According to the American Kennel Club, the month of February is Pet Ownership Month. Owning a dog is not just a privilege-it's a responsibility. If you are considering taking a dog into your life, you need to think seriously about the commitment that dog ownership entails. If you already have a dog, you need to consider if you are fulfilling all your obligations as its owner.

1. **Spay or neuter your dog, cat, rabbit or ferret.** To prevent the companion animal overpopulation from getting worse, spaying or neutering is the most effective means. The ASPCA estimates that five to seven million animals enter shelters nationwide each year.
2. **Schedule an annual veterinary checkup.** Most animals are experts at concealing pain and illness, that's why it's so important for your pet to visit the vet each year for a full check-up. Remember, a healthy lifestyle and regular vet visits are the first steps to a long, happy life with your pet.
3. **ID and/or microchip your pet.** Current ID tags on your dog or cat's collar can help ensure that they get home safe and sound if they should wander out of your sight. Also, talk to your veterinarian about getting a microchip for your pet.
4. **Be prepared.** Most first aid kits can be purchased fully stocked, but no kit is complete without an ultra-muzzle. This ultra-comfortable muzzle is perfect for when introducing pets to new situations or when trying to restrain and treat a wounded or hurt pet.
5. **Travel Safely.** You wouldn't ride without using a seatbelt and neither should your pet. Ensure you research ways to protect your dog when traveling in a car.
6. **Pet proof your home.** It's important to avoid bringing potentially hazardous products into your home. Being educated about the dangers of certain houseplants and choosing more "bio-friendly" products are usually a good place to start.

For more information visit the American Kennel [website](#).

PARENTS...SOME CHOICES ARE LIFE THREATENING

Be Water Smart. Protect Children Around Water.

*Talk to your Children
About Water Safety
Even if You Think They Are
Not Ready to Hear It.*

Keep the Message Simple

**“Don’t go near a pool
without an adult.”**

**“If you see someone that
needs help in the water, do
not go in the water after
them. Get an adult to
help.”**

**“If you fall into a pool,
reach for the wall, hold on,
do not be afraid, yell for
help, and if you can, climb
out.”**

It Can Happen to You

Many parents who lost a child to drowning never thought their own child was at risk.

Don’t Pass the Buck

- ⊗ Be proactive about your child’s safety.
- ⊗ Know who is watching your children.
- ⊗ Do not put the responsibility on siblings or older children to supervise your children.
- ⊗ Do not think a lifeguard will watch your children like you do; a lifeguard has to watch every swimmer. You can give your child constant, close supervision.
- ⊗ Teach your child to swim.

Be Vigilant About Doors

- ⊗ Create a routine for everyone in the house, even visitors, to shut and lock doors; check them frequently.

Do Not Multitask

- ⊗ Supervising a toddler means your eyes are on them and they have your full attention.
- ⊗ Pool time is quality time with your child or children, not a time to text or return phone calls.

Have an Emergency Response Plan in Advance

- ⊗ Plan what steps to take and practice them
 1. Remove child from the water.
 2. Call 9-1-1.
 3. Begin CPR.

ALWAYS SUPERVISE AROUND WATER
