Michael O’Harra
Regional Administrator, FAA Southern Region
1701 Columbia Avenue
College Park, GA 30337

Mr. O’Harra:

On behalf of the City of Weston I submit to you the attached Resolution encouraging the FAA to adopt additional measures to mitigate the impact of aviation noise over our community west of FLL. Also attached is a Report from JDA Aviation Technology Solutions (the “Report”) supporting the City’s recommended additional measures.

The Report addresses, and the City acknowledges, the new procedure implemented in November 2021 that raises the elevation for flights approaching the north runway (10L) from the west. This was a recommendation in the City’s response to the 14 CFR Part 150 study and report, and we appreciate that it was considered and implemented.

The City Commission of the City of Weston firmly believes that these additional measures should be taken to further mitigate aircraft noise, some of which may be welcomed by the airlines, as those measures might lead to certain efficiencies. We recognize that procedure changes require review and analysis. We encourage that review and ask for follow up communications to inform us if/when additional actions are taken, or to explain why these recommendations may not be adopted.

Sincerely,

THE CITY OF WESTON

Donald P. Decker
